

# SUMMER MATH PRACTICE

Math practice is vital for students in the summer. It helps them to keep content fresh in their minds as they play and enjoy their break. It can also be a time where students who struggled, can build essential skills that will benefit them in the next year. For all students, fact practice is the most important for them to be prepared for the upcoming school year. Rising 1st-2nd grade students should practice their addition and subtraction facts. Rising 3rd-5th grade students should practice their multiplication facts. There are many great online websites that help with practicing these facts. A short list of some of these sites will be located at the bottom of this page. In addition to all of the free online programs, Cumberland has a great resource that we hope you will find beneficial during the summer months. All of the students who were enrolled in Cumberland for the 2021-2022 school year have a login and the ability to access their Freckle account. This is a great resource to practice math skills that they need to know for the upcoming school year. In order to access Freckle students will need to visit the tab that the school saved to their device during the school year. If you are trying to access Freckle from another device you will need to access Freckle from this link. <https://global-zone05.renaissance-go.com/welcomeportal/388012>. Students will need to use their login and password that they set up throughout the year. All student logins follow the format of firstnamelastname with all lowercase. If your student was in 1st-2nd grade their password was cumberland2020. If your student was in 3rd-5th grade they have created their own password. If you have any questions please feel free to contact the office at the lower school.
